MODULAR PACKING TABLES, BENCHES AND ACCESSORIES

Have you taken a look at your packing area lately? Is it cluttered? Are cartons, paper and packing materials all over the place? Does the area look disorganized? Is the flow of material awkward and inefficient?

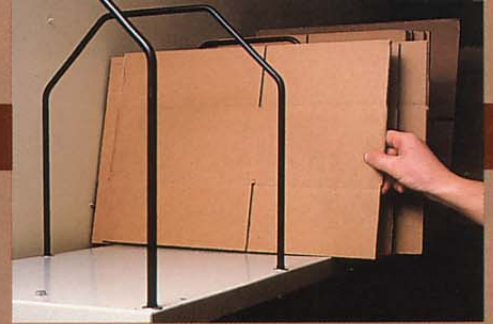

If this is what you see, TIME AND MONEY are being wasted. But don't be alarmed. Most packing areas look this way before they are equipped by Dehnco. For over fifteen years Dehnco has been improving packing operations, making them more effective, each packer more efficient and productive. And, most installations pay for themselves in less than a year.

Please note the popular assemblies illustrated. There is probably one just right for your operation. If not, remember all components are modular and can be arranged to meet your needs. All tables and benches are strong, durable and they reflect Dehnco's well known high quality. Equally important, they are very affordable.

*Let Dehnco help you ergonomically design
 your packaging area to improve efficiency
 and increase productivity*

Everything your packers need right at their fingertips...

ACCESSORY SYSTEMS FURTHER IMPROVE EFFICIENCY AND PRODUCTIVITY

CUTTER BAR and KNIFE ASSEMBLY comes complete and can be easily mounted in line with any existing roll storage system. Enclosed rotary knife cuts most roll materials—paper, plastic, vinyl, fiberglass, foam, air cap, teflon, foil, etc. Knife cuts in both directions. It has a one-year functional guarantee. Built-in separators accommodate rolls of material. Available in five sizes to cut materials up to 72-inches wide. Cutter can be equipped to operate pneumatically. Special size assemblies can be fabricated.

ROLL STAND (Cutter Optional) Assembly will hold a roll of material up to 46-inches diameter. Or, with additional roll bar assembly units, will hold up to four rolls of material. Stand is constructed of 1½-inch square, tubular steel. Roll stands are available for all five sizes of Dehnco Cutter Bar & Knife Assemblies. Legs are adjustable in height. Stands can be equipped with casters.

FLOOR MATTING

Dehnco can satisfy a wide variety of your floor matting needs with products like these:

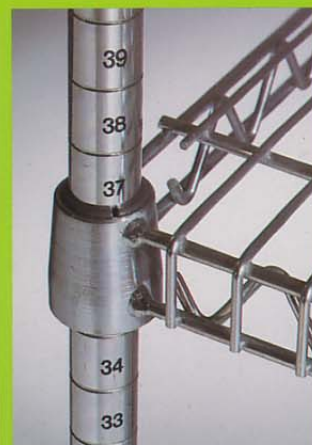

- **Cushion-Lok™** heavy-duty industrial matting is the ultimate in safety, anti-fatigue mats for benches and heavy equipment areas. Can be configured to your specific work area.
- **Airug™** is tough, economical and provides insulation from cold as well as reduction in noise. A low cost practical way to reduce fatigue and increase worker morale.
- **Cushion Stat™** reduces uncontrolled static discharges. It helps eliminate the potential threat of data loss or damage to sensitive micro-circuitry while relieving leg and back fatigue.
- **Storm King Olefin™** is ideal for plant entryways. Reduces maintenance cost and saves money.

A wide variety of other specialized matting is also available to meet varying requirements.

WIRE SHELF SYSTEMS

- Wire shelf units are available in over 30 sizes from 14" wide x 24" long to 24" wide x 72" long. The unique two truss support system on each edge provides exceptional strength and a very flat surface.
- Speed-lok nylon inserts help to quickly and automatically position and level the shelves on the post.
- Accessories are available to permit the shelf units to be linked together or to be used in a variety of ways.

- Post heights vary up to 86" high. Each post is incrementally notched and numbered to insure quick and easy assembly.
