The "CJ" frame is made of 1 5/8" O.D. schedule 40 pipe. It has a wide tip resistant design which is welded for rigidity and then hot-dip galvanized after fabrication. Top and seat cleats are 2" x 2" x 3/16" steel angles. Center cleat is 1 1/2" x 1/2" steel channel which provides level top and sturdier attachment of the 1 5/16" galvanized cross braces. Purchase as frame set only or complete with your choice of planking.

WHEELCHAIR accessible model has 8 ft. top (centered) and 6 ft. seats. To order, use 8' model no. and price, then add "HC" to the model no. Because end access requires a 24" overhang at one end of the table top, it can easily cause a table to be up-ended if someone sits or leans on that end. Kay Park has addressed this concern by welding anti-tip supports (patented) to the side of the table legs (as shown) on our heaviest "J2" frame. This method places the outer bearing point closer to the end of the table. The result is a picnic table with end access that is less hazardous to the general public than other designs.

These models are designed so that you can have wheelchair access from the side, end, or both on the same table! Toe clearance on the tables is 24", width clearance is 30", with 29" under the table top. Welded anti-tip extensions (pat. # 6116681) on the legs overcome the possibility of upending a table with such a long overhang, as required by A.D.A.
