

# Cluster Box Units (CBU's)

## CLUSTER BOX UNITS FRONT LOADING

Made of heavy duty aluminum and stainless steel hardware, Salsbury 3300 series U.S.P.S. approved pedestal cluster box units (CBU's) are accessed from the front through two (2) easy opening master door panels. The durable and corrosion resistant units feature a powder coated finish available in six (6) contemporary colors and can be mounted on the optional pedestals (#3385 for #3316 or #3313 and #3395 for #3308 or #3312) or a base of your choice. Each aluminum door includes a heavy duty five (5) pin cylinder cam lock with a dust/rain shield and three (3) keys. One additional compartment in each unit is labeled "Outgoing Mail" and includes a weather protection flap and a 11-1/2" W x 3/4" H mail slot. Each unit includes one or two (2) fully integrated parcel lockers.

### Salsbury Industries Manufactures CBU's that are Officially Licensed by the U.S.P.S.

Salsbury 3300 series Cluster Box Units are manufactured to U.S.P.S. "F" specifications. They are an officially licensed product of the U.S. Postal Service for centralized mail delivery.

**PARCEL LOCKERS** are built into each cluster box unit. They offer tenants a convenient way to receive packages on site and are fit with a two (2) key security system. When the U.S. Postal Service delivers a parcel to the locker, a parcel locker key is placed in the recipient's mailbox. Once the recipient opens the parcel locker, the key is automatically retained in the lock until it is removed with a control key. Parcel lockers include both the tenant lock and the master postal lock.

**Note: For matching stand-alone Outdoor Parcel Locker (OPL) units (#3302), see page 73.**
