STYLE 840 WOVEN WIRE PARTITIONS

For over thirty years, Wire Crafters has manufactured a revolutionary style of woven wire partition. Contrary to traditional systems, our Style 840 is based on the simple idea that 4' or 5' high panels stack one on top of the other between tubular posts to reach the finished partition height. Panels can be stacked as high as forty feet. Adjustable panels allow for partition width adjustments from one to twelve inches, or special width panels can be ordered. This all welded, modular, stackable system has benefits unequaled in the industry.

SIMPLE Wire Crafters modular system utilizes twenty standard panels to accomplish nearly any layout. These panels simply bolt between posts. Drawings provided with each order make installation easy enough for your own personnel.

STRENGTH Panels bolt to posts which have welded base plates for direct anchoring to the floor; no brackets or shoes to come loose.

FAST The 840 system installs as fast or faster than any other system on the market. Our angle frame panels with slotted bolt holes give clear access to assembly hardware and allow fine tuning adjustments without compromising the strength of the installation. Our system does not require level floors and precise alignment like some hook and slot mounting systems.

TAMPER-PROOF Our 3/8" hardware - the heaviest in the industry - is inaccessible from the exterior of the partition, preventing intruders from disassembling the parts to gain access to secured items.

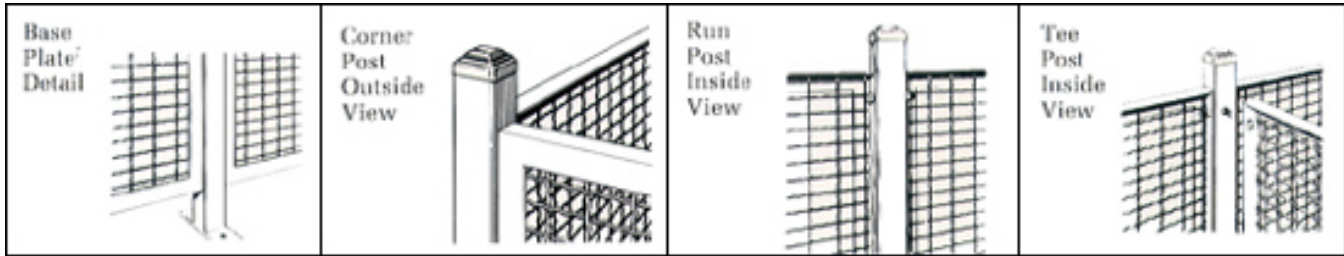

QUICK-SHIPPING Our continued commitment to customer service dictates that we maintain an inventory of stock size parts ready for shipment with 48 hours of receiving your order.

OPEN BUT SECURE The woven wire mesh construction provides a formidable barrier to intruders, while allowing the free passage of existing lighting, sprinkler, and ventilation systems.

STOCK PANELS & POSTS

Typical Post Panel Connection

Style 840 panels are 1' to 10' wide, and 4' or 5' high. Full height partition walls are built by stacking two or more panels between standard posts. Posts are configured for a standard 3 1/4" sweep-space, and project 2" above the panels. Our standard panels can be used in ceilings or walls. Stack panels to any height by extending the length of the post. Flush to the floor partitions can be made by modifying the post's standard hole layout.

POSTS

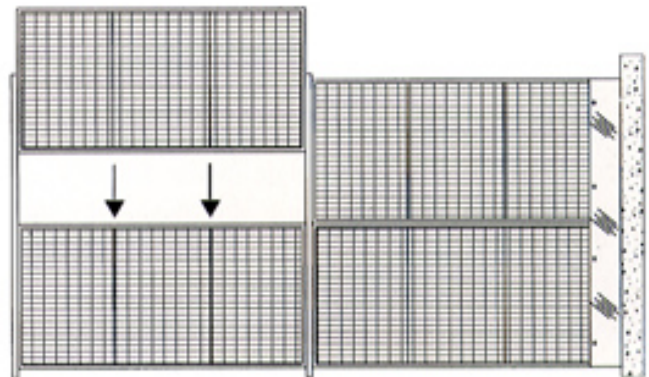

- Stock sizes: 8'-5 1/4", 10' -5 1/4", and 12' -5 1/4"
- Standard hole layout allows for 3 1/4" sweep-space.
- Posts project 2" above top of panel.
- Standard baseplate: 2" x 7" with holes for anchors.
- Special length posts are available to 40'.
- Oversized base plates are available.
- Floor anchors (3/8") are included with your order

WOVEN WIRE PANELS

- Ten widths: 1'-0" to 10'-0" in one foot increments
- Two heights: 4'-0" and 5'-0"
- Standard Mesh: 10 gauge (.135) wire woven into 2"x1" rectangular opening (other mesh available)
- Standard Frame: 1 1/4" x 1 1/4" x 1/8" steel angle.

ADJUSTABLE PANEL

For hard to measure areas, use our sheet metal adjustable panel. It allows for partition width adjustments from 1" to 12".

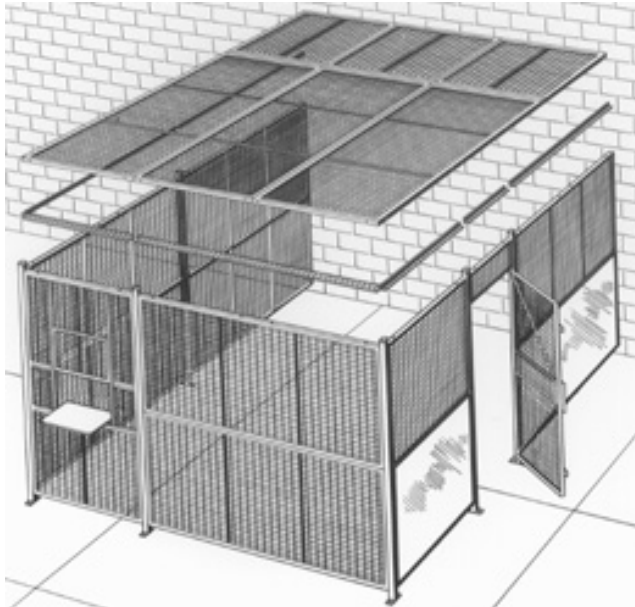

Stackable Panels

Adjustable Panel

CEILING

- Use same panels as walls.
- Attach to partition walls with slotted angle.
- Clear spanned up to 35'.
- Large ceilings supported by 2" square horizontal ceiling tubes.
- Add to existing partition without changing layout.
- All ceilings are non-load bearing.

SERVICE WINDOWS

- Lockable, slide-up window secures opening when unattended.
- Window opening: 24" wide x 20" high.
- Shelf size: 24" wide x 18" deep x 10 gauge.
- Shelf height: 42 1/4" off of floor level.
- Panel size: 4'-0" wide x 8'-0" high; transoms extend height to 10' or 12'.
- Counter balanced, hinged, or mechanically operated windows in various sizes are available.

CUSTOM PANELS AND POSTS

WireCrafters maintains a large inventory of materials for quick delivery of custom partitions. Our standard 840 system can be modified in several ways to meet many different requirements. For example, our standard 2" x 1" woven wire mesh may be replaced with:

- sheet metal to create solid panels for totally enclosed areas
- Smaller 1/2" square opening mesh for secure storage of small items
- Larger 2" square opening heavy wire mesh for high security items
- Clear Lexan® sheets for partitions that prevent access without presenting any visual obstruction.
- Expanded metal for partitions with a different look.

Panels made of different materials may be mixed together or used uniformly.

Furthermore, we can build our standard frames and posts out of heavier materials when conditions dictate extra security or durability. Call us at 800-626-1816 or 502-363-6691 with your special requirements. "We will be glad to assist you."

STOCK GATES & DOORS

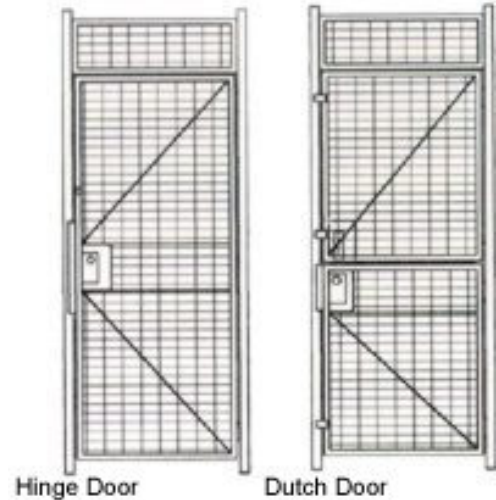

HINGED DOORS

- 3' or 4' wide by 7' -3 1/4" high opening.
- Transom panel sized to match partition height.
- Three 4" x 4" 10 gauge tight pin hinges.
- Padlock lugs standard, cylinder locks available.
- Complete with two door posts and hardware.
- Universal construction, works for left or right hand, inside or outside swing.

DUTCH DOORS

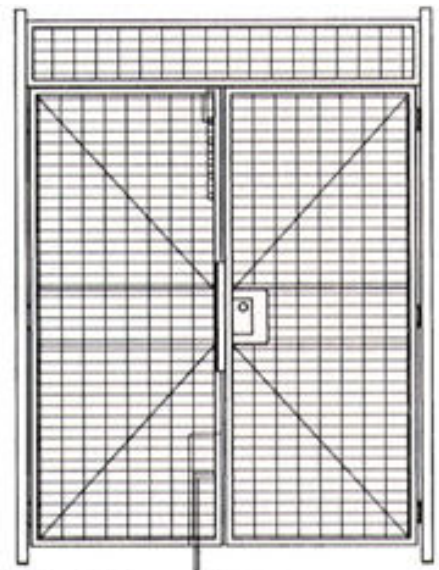

same as above except:

- Two separate operating door leaves
- Bottom leaf locks with padlock, cylinder lock available.
- Top leaf locks to bottom with spring bolt.
- 10 gauge shelf, 18" deep x door width fixed to bottom leaf.
- Must specify hand and swing of door

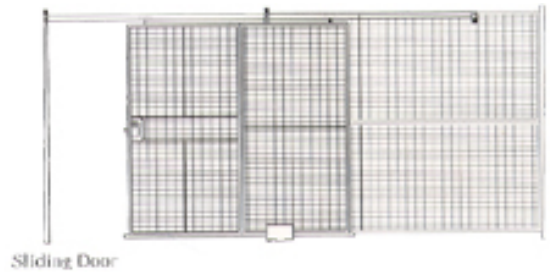

DOUBLE HINGED DOORS

- 6' or 8' wide by 7'-3 1/4" high opening.
- Inactive leaf secured by cane bolt (base) and chain bolt (top).
- Padlock lugs standard, cylinder lock available.
- Complete with two door posts and all hardware.
- Transom panel sized to match partition height.
- Custom size and no overhead obstruction doors available.

SLIDING DOORS

- 3', 4', 5', 6', 8', or 10' wide doors in stock.
- Full height openings of 8' 0" or 10' 0".
- Padlock lugs standard, cylinder lock available.
- Complete with two door posts, two 4-wheel trolley trucks, 16 gauge track and all hardware.
- Universal construction, works for left or right hand, inside or outside.
- Custom size sliding doors are available.

NON-STOCKED GATES & DOORS

If the size or type of gate needed for your application is not listed above, feel free to contact us about building a special one for you. We have years of experience satisfying the most demanding requirements, and have many standard designs for special applications on file. Some of the special gates we developed are shown below. Please call give us a chance to help with your special situation.

TUNNEL DOORS

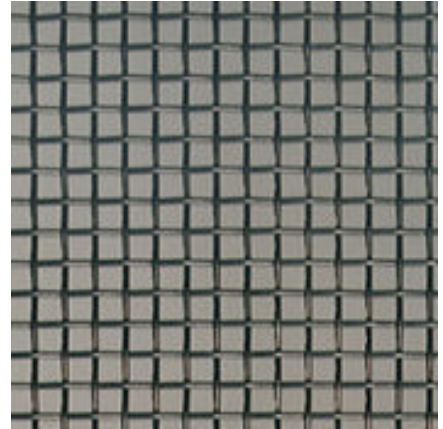

- Designed for no overhead obstruction.
- Leading edge of door rolls on floor casters.
- Rear of door hangs from door track.
- All sizes made to order.
- Ideal for high traffic areas, and where overhead crane access is necessary.

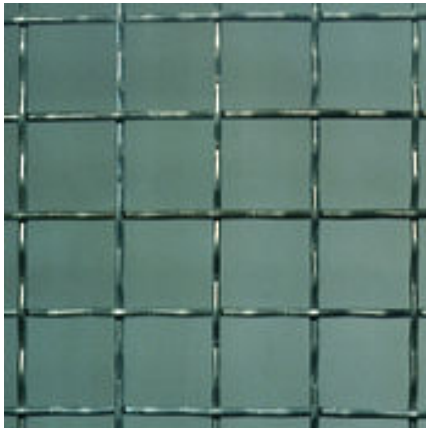

In addition to manufacturing our line of Woven Wire Partitions, we have the ability to produce many different sizes of woven wire mesh for use in special partition applications. The most popular mesh sizes are stocked and ready for your special requirements. Our large inventory of these items allows us to make fast deliveries.

Stocked Sizes:

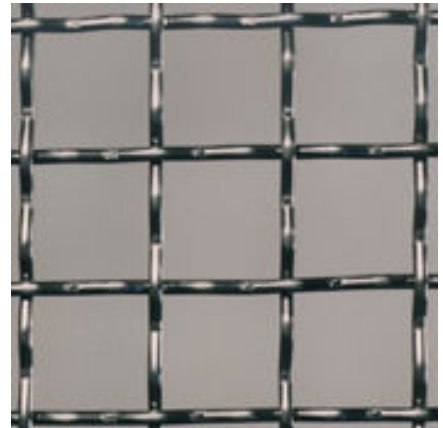

- 2" x 1" rectangular opening 10 gauge (.135)
- 3/8" square opening 12 gauge (.105)
- 1-1/2" square opening 8 gauge (.162)
- 2" square opening 6 gauge (.192)

3/8" square opening 12 gauge (.105)

2" square opening 6 gauge (.192)

1-1/2" square opening 8 gauge (.162)
