APPLICATION OF A 4WAY HAND PALLET TRUCK

Four Way Hand Pallet Trucks with Pallet Stops* – Allow the Operator to handle four-way-entry pallets easily in all four directions. This Maximizes trailer load density while restricting fork entry in adjoining pallets.

*Note: Pallet stops are standard feature of the L50MU-4way only and must be ordered as an option with the L50M-4way.

STAINLESS STEEL COMPONENTS

LIFT-RITE®

FEATURES OF THE FREEZER SPECIAL HAND PALLET TRUCKS

Freezer Pump Unit

External components are Cadmium plated to protect from condensation and Low temperature hydraulic fluid prevents freezing.

Hot Dipped Galvanized Frame

Galvanizing process gives durable corrosion protection that stands up to the constant abrasion of pallet entry and exit.

Nylon Wheels and Rollers with shielded ball bearings

Solid nylon provides a durable rolling surface that will not wear prematurely in applications with extreme temperature changes.

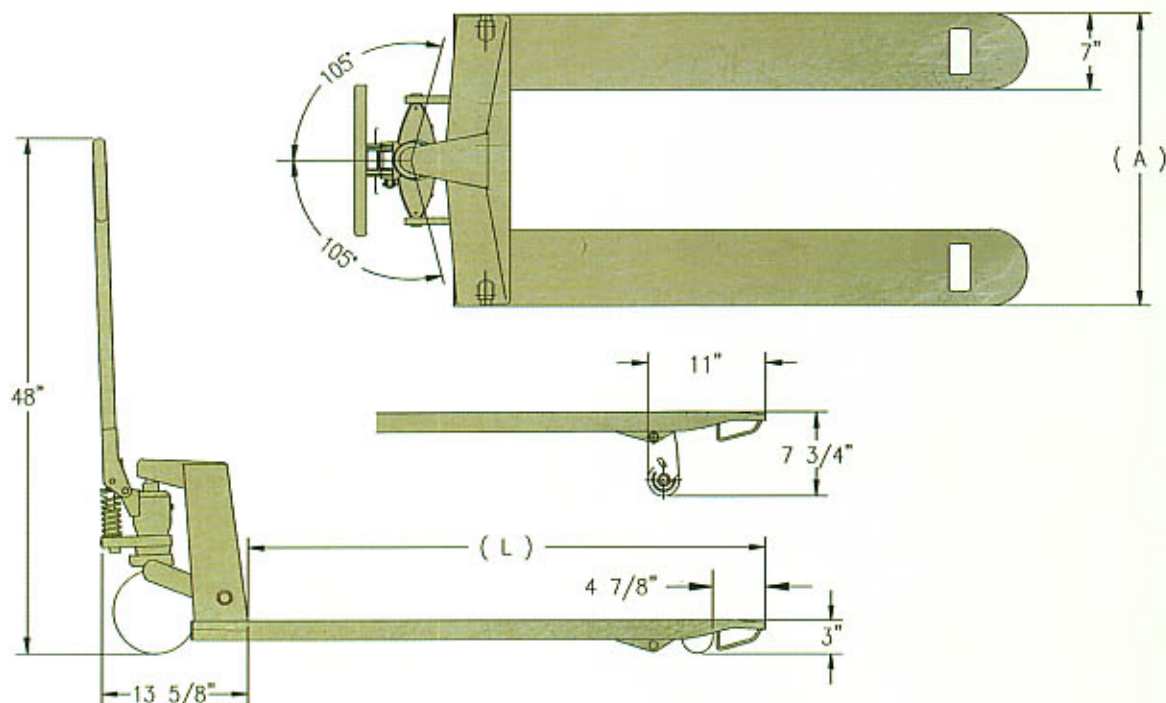

Stainless Steel Components

The pump pistons and fork pins are critical components that require the full corrosion resistance of high quality Stainless Steel.
