The human body is meant to move. That's why sitting for prolonged periods can cause all sorts of problems, from muscle strain and stiffness to back and neck pain to lack of circulation and energy. In the workplace, such ailments contribute to lost productivity, absenteeism and even worker's comp claims.

VariTask® can help you and your employees avoid these troubles – by empowering users to vary their positions throughout the day. From sit to stand and back again, VariTask promotes a healthier, more efficient workforce.

Intertek

MAKE A MOVE FOR THE BETTER.

VariTask workstations are available in more than 900 standard laminates from Nevamar®, Wilsonart®, Pionite® and Formica® at no additional upcharge. VariTask LT model 655LT shown in Classic Rock laminate with Desert Sage finish.

VARITASK LT

Economical ergonomics.

A tight budget is no reason to skimp on comfort and health – not when VariTask LT provides the most cost-effective sit-to-stand solution on the market today. Like all VariTask workstations, it operates with the flip of a switch, no cranking required. Another line-wide benefit: you can choose preconfigured workstations or retrofit existing desks with a VariTask base.

VariTask lets users find their own level of comfort, from shift to shift, day to day, or hour to hour – perfect for high-volume call-center operations. Model 609LT shown in White Essence laminate with Mist finish.

VARITASK LT FEATURES:

- Electric drive mechanism.
- 16.5" of vertical adjustment, from 25" to 41.5".
- Supports up to 120 lbs.
- Meets ADA standards.

Model 685LTW

VARITASK LT

VariTask LT is available as a single-surface desk or a double-surface desk with keyboard mechanism, in both rectangular and corner configurations. Model 655LT shown in Classic Rock laminate with Desert Sage finish.

VARITASK XR

Size Wise.

Height adjustability isn't just for promoting movement. It's also for supporting diversity. People come in all sizes, and VariTask XR accommodates every one of them. No more raising or lowering panel-hung worksurfaces when a new worker or department moves into an existing space – each person can define their own optimal surface height in a matter of seconds.

Three memory settings on the VariTask XR control switch let workers "save" their favorite positions. Model 5300SL shown in Gray Essence laminate with Graphite finish.

VARITASK XR FEATURES:

- Electric drive mechanism.
- 26.5" of vertical adjustment, from 24" to 50.5".
- Supports up to 250 lbs. (dual-column) or 350 lbs. (triple-column).
- Three-position memory settings.

Model 530L with optional modesty panel.

VARITASK E-SERIES

VariTask E-Series is available in single-surface and dual-surface corner and rectangular units, and in a single-surface kidney shape. Model 650WL shown in White Essence laminate with Sand finish.

E for environmental.

We burn more calories standing than sitting, so VariTask can help reduce the average weight of your workforce – and smaller people have a smaller environmental footprint. VariTask also promotes healthy air. All models are Intertek Green Leaf VOC+ Certified, verifying that they meet or exceed BIFMA, LEED and California emission standards. So you – and your employees – can breathe easy.

VARITASK E-SERIES FEATURES:

- Electric drive mechanism.
- 16" of vertical adjustment, from 26" to 42".
- Supports up to 150 lbs.
- Rectangular and corner units available with a tilting keyboard mechanism.

Model 610L

VARITASK CLASSIC

VariTask Classic Model 12563WL shown in Maple laminate with Sand finish. Both corner and rectangular Classic models can also be equipped with DataCenter keyboard mechanisms.

The speed of height.

VariTask Classic travels through its entire range of vertical adjustment in just 18 seconds. Other VariTask models are even faster. A simple flip of a switch puts workstations in motion and stops them at the desired height. So users won't waste undue time waiting for desks to shift position or climbing under desks to turn unwieldy cranks. VariTask increases comfort without decreasing productivity.

VARITASK CLASSIC FEATURES:

- Electric drive mechanism.
- 14" of vertical adjustment, from 26" to 40"
- Supports up to 250 lbs. per column.
- Meets ADA standards.

Model 12348L

VARITASK STEALTH

VariTask Stealth delivers style *and* strength, supporting up to 550 lbs. of equipment with elegant grace. Model 22114L shown in Crown Cherry with Black finish.

Attractive and attracting.

With its clean, simple lines and tremendous range of finish options, VariTask seamlessly integrates height adjustability into any office space. But good looks are only part of the attraction: with recent news that sitting too long can shave years off your life, the fact that you care enough to offer sit-to-stand workstations can help you recruit and retain quality people.

VARITASK STEALTH FEATURES:

- Electric drive mechanism.
- 16" of vertical adjustment, from 26" to 42".
- Supports up to 450 lbs. (dual-column) or 550 lbs. (triple-column).
- Three-position memory settings.
- Meets ADA standards.
