Aurora Shelving and Mobile Storage Systems

- Applications for basic storage, filing, library and media storage
- Save floor space and increase storage capacity
- Clean design, secure, sturdy and easy to assemble
- 22 color finishes and a variety of laminate and wood accents to complement your décor
- Shelving heights from 40-121 inches, widths from 30-48 inches, depths from nine to 36 inches
- Shelf weight capacities up to 1500 lbs.
- Both lateral and compacting movable systems with weight capacities up to 1500 lbs. per carriage foot

Easy 5-Minute Assembly...

fastest of all shelving... no hand tools needed...
no sway braces, nuts, bolts, or clips.

1. Position uprights. Temporarily place one shelf support at any convenient location to properly space uprights.

2. Build from the bottom up. Place shelf supports (front and back) for lowest shelf only.

3. Fit shelf over supports. Then add two more supports at the next shelf location... place shelf... continue up the unit.

4. Add extra sections. Utilize common center uprights. (An additional upright must be used to add extra sections.)

MultiSort

MultiSort presents the ultimate modular furniture system for flexible mailroom and copier center design. There's no need to purchase expensive custom millwork when MultiSort provides floor and wall mounted cabinetry in laminate and hardwood veneer finishes.

Easily relocated, you don't have to scrap it or give it back to the landlord when you move or change your room layout. The "Lego" style construction of the sorter units allows complete height and width reconfiguration. Sorters come with interchangeable trays, shelves, drawers and doors in multiple colors.

Costs are 25 to 40 percent less than custom millwork and Modular Millwork has a seven-year depreciable tax life versus 31 years for built-ins.

RivMax™ Boltless Shelving System

RivMax™ is a hand-loaded metal framing system which is quick and easy to assemble and disassemble. The key to RivMax™ is the rivet to slot and rivet to dimple connections.

- Clear shelf access from all four sides.
- Particle Board, plywood, oriented strand board, metal and wire shelf surfaces available.
- Available in large variety of sizes—heights to 22', widths to 8' and depths to 4'.
