## Liberator Hand Truck

- Full selection of Handles available which are manufactured with machined and welded joints for unmatched strength and durability versus a crimped and welded joint.
- All "U" Braces and Frame Extensions are made of High Strength Extruded Aluminum, instead of a slim, flat plate that can bend or break under heavy use.
- Thicker and stronger 600 lb. Capacity Heavy-Duty Frame with notched side rails, that is the basis for full parts compatibility with other modular aluminum industry units.

- Crossbars are a complete four-sided tube with ribbed sidewalls for exceptional strength. Provides better frame integrity in place of a 3-sided, open bottom, flat plate tube.
- The Crossbars are attached to the frame with 4 (2 per side) individual Aircraft Grade Rivets as opposed to 2 (1 per side) spin rivets which produce loose joints over time.
- As an added feature, a wide variety of Curved Back Frames all come standard with Extruded Aluminum Crossbars in favor of the weaker hollow plastic kind.
- All nose plates are constructed of non-cracking, High Strength Extruded Aluminum, unlike brittle diecast aluminum or magnesium noses that can bend/crack at the base and tip.
- Upgraded 600 lb. Capacity High Tensile Steel Axle will not bend or fatigue under heavy-duty applications such as Armored Car or Newspaper Delivery.
- Wheel brackets formed from non-cracking, High Strength Extruded Aluminum, unlike brittle diecast aluminum wheel brackets which can bend/crack under normal use.
- Innovative, non-cracking, High Strength Extruded Aluminum Stair Climbers with ½" Thick Heavy-Duty Wear Strips will outlast all diecast aluminum ones with thin plastic strips.
- **Revolutionary** Brake System exerts equal pressure on both wheels and gives you the safest, most user friendly Hand Brake in the industry. Fits all B&P Handles and most competitors standard handles with NO special adaptation kits needed for easy field installation and reduced costs!

## 2 Year Warranty on Liberator Hand Trucks and Liberator Dockboards

Warranty covers failure on genuine B&P Manufacturing Liberator hand truck and Liberator dockboards due to defective material and/or workmanship. The 2 year warranty covers the following Liberator components: dockboards, hand truck frames, frame components, handles, nose plates, nose plate brackets, axles, axle brackets, stair climbers, stair climber components, frame extensions, and any other genuine B&P Manufacturing Liberator Hand truck parts. Liberator parts that are not covered under the 2 year warranty are: tires, inner tubes, wheels, bearings, lift chains, and parts other than genuine B&P Manufacturing Liberator parts. These items carry the standard warranty as follows.

\*

### Standard Warranty

The seller warrants to the original Purchaser that the items covered by this agreement shall be free from defects in material and workmanship under the normal use and service for a period of one year from the date of shipment of the seller. If within such a period any such product is proved to be so defective, such product shall be repaired or replaced at Seller's option. Seller's obligation is limited to such repair and replacement and is conditioned upon Seller's receiving written notice of any alleged defect within the warranty period and no more than (10) days after its discovery. After written approval by the seller, the product or defective part must be returned to the seller, f.o.b. its factory. The term "Original Purchaser" as used in this warranty shall mean the person or entity to whom such product was shipped by seller or its distributor or seller's agent.

This warranty shall not apply to products or parts repaired or altered by other than the Seller or subject to negligence, accident, abuse, misuse or damage.

This warranty does not apply to parts subject to wear.

With respect to parts not manufactured by Seller, the warranty obligations of Seller shall in all respects conform and be limited to the warranty actually extended to seller by the supplier.
